Honda Spool Filter & Variable Timing Solenoid Gaskets

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

Honda & Acura's VTEC technology allows engines to maximize power and efficiency, by adjusting valve timing and lift using oil pressure to activate the system. If oil change maintenance schedules have been neglected, the screens in the oil housing gaskets will become clogged preventing the VTEC mechanism from working properly.

Most of these gaskets are pricey and historically only available from the dealer. In some instances, the dealer would have to sell the entire Variable Valve Timing Solenoid when all that was needed was a gasket that sells for a fraction of the cost of a VTEC unit. AJUSA is first to market on many of these individual gaskets, and for some, the only alternative to the dealer supplied complete VTEC unit.

Now, AJUSA, brought to you by CRP Automotive, has developed gaskets for the most common Variable Timing Solenoid and VTEC/Spool Filters, and we are proud to offer all six of them in one part number. PN# 01140000 includes three Variable Timing Solenoid gaskets and three VTEC/Spool Filter gaskets. Each gasket is individually packaged with AJUSA part numbers, making reordering easy. This kit covers over six million Honda and Acura vehicles, so keeping one on the shelf will save you time and money and ensure you have the correct parts "in house" to complete this repair.
