## Asian Power Steering Hoses

Data available through Activant/Epicor (Code: CNN), WHI (Code: CPD), or [ShowMeTheParts.com](http://ShowMeTheParts.com)

Extreme temperatures, constant high pulsating pressures as well as impurities found in the power steering system can all contribute to the deterioration of a power steering hose. Worn out or leaky power steering hoses are extremely dangerous. Loss of power steering pressure due to a leaking hose can compromise a driver's ability to control their vehicle and could cause an accident. Loss of power steering fluid can also damage the vehicle's power steering pumps and racks, resulting in costly repairs. When replacing a vehicle's pressure hose, it is recommended to replace all power steering, suction, and return hoses as preventative maintenance.

**Rein Automotive is now proud to offer a quality Asian Power Steering Hose program.** This program includes high-pressure, suction, return, and oil cooler hoses. Rein Automotive is the **first** to offer high quality replacement power steering hoses that meet or exceed the OE quality for Asian vehicles, ensuring maximum performance and longevity. By using OE quality or better hoses, we ensure that the hoses will withstand the extreme temperatures and pressure spikes created within the power steering system. Rein Automotive's Asian power steering hose offering includes brackets, O-rings, clamps, and hardware (where needed) to make replacement of the aged original parts much easier for professional repair technicians.

CRP Automotive's product teams understand the complex inner workings of the complete power steering system and are first-rate power steering experts with knowledge you can trust.

### FEATURES:

- **OE form, fit, and function** – hoses perform identical to the OE
- 33 SKU's for Asian applications, 12,000,000 total VIO (US and Canada)
  - 15 SKUs are first-to-market hoses
- Offering includes OE design brackets, O-rings, clamps, and hardware (where applicable), making installation easy and exact
- Power Steering Hose Kit – complete assembly with OE design sensor
