Exhaust Temperature & Pressure Sensors

Data available through Activant/Epacor (Code: CNJ), WHI (Code: CPD), or ShowMeTheParts.com

In today's world of low emissions and high fuel economy, having a durable and accurate exhaust temperature sensor is important to your engine's performance. A sensor that has been damaged or is out of tolerance can cause a car to fail emissions testing and waste fuel. Rein Automotive offers a line of high quality OE exhaust sensors for Audi and Volkswagen 2009-2015 4 Cyl. 2.0 and V6 3.0L diesel engines used in A3, Q7, Beetle, Jetta, Passat, and Golf models. These sensors accurately monitor the vehicle's exhaust gas temperature with millisecond response times even at high gas velocities. This enables the ECU to properly regulate exhaust gas after treatment systems and control the engine conditions to maximize fuel economy, minimize emissions, and protect the engine from overheating.

Rein Automotive also offers Exhaust Differential Pressure Sensors for Audi and Volkswagen diesel applications. These sensors reduce harmful soot emissions and help the engines run smooth. These OE sensors are resilient to exhaust gases and accurately measure the pressure difference over the vehicle's particulate filter. This enables the ECU to properly control the filter regeneration cycle, which prevents blockage of the filter and reduces emissions and harmful soot.
