PENTOSIN TRANSMISSION FLUID SERVICE KITS

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

Transmission fluid services are an important part of regular maintenance and will increase the service life of your transmission. According to the Automatic Transmission Rebuilders Association, 90% of automatic transmission failures are caused by overheating and can be often blamed on transmission fluid that should have been replaced. Completing the recommended interval changes at approximately 50,000 miles can extend the longevity of your car and improve its performance. CRP Automotive has created a kit designed specifically for this service by bringing together two of our great brands – Pentosin, OE approved fluid (ATF 1) and Rein Automotive. Pentosin ATF 1 is a long-life fully synthetic high performance automatic transmission fluid designed for lifetime application in automatic gear boxes. Pentosin ATF 1 is designed for popular Audi, BMW, and Volkswagen models with over 16 million VIO in North America.
