Part No. HP1103F

Part No. HP1104F

Effective Date:
April 1, 2019

NEW OEM EHPS PUMPS

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

Many late model FCA Group vehicles in the United States and Canada make use of electrohydraulic power steering systems. These vehicles use an electrohydraulic pump to assist the driver when steering the vehicle. Similar to other electrohydraulic pumps, such as the one used on many MINI Coopers, these can fail from time to time due to the conditions they are expected to operate in.

CRP Automotive now offers five new AAE branded EHPS pumps for popular Chrysler and Dodge applications. These pumps have been sourced from our global partners and are manufactured by the OEM. They are of the highest quality available and present a significant cost savings for customers.

Part No. HP1102F

CRP Part No.	Applications	VIO US	VIO Canada
HP1100F	DODGE CHALLENGER 3.6L 2011-14; CHALLENGER 5.7L 2011-14	137,861	3,903
