REIN AUTOMOTIVE BRAKE VACUUM PUMPS

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

Rein Automotive now offers a line of brake vacuum pumps designed and built by OE manufacturers for popular Audi, Alpina, BMW, Mercedes-Benz, Rolls-Royce, Volkswagen, and Volvo applications. These pumps are designed to be a plug and play replacement for failed original units and will provide the technician and the vehicle owner with a solution to various performance and safety issues to ensure a long, service-free life.

Vacuum pumps are used in vehicles with engines that do not produce sufficient vacuum to provide power to the braking system, EGR valves, intake manifold switches, as well as turbocharger actuators and others. When vacuum pumps fail or operate with reduced efficiencies it can lead to reduction in braking power, reduction in part and/or full load performance, triggering a check engine light or limp mode, or engine misfires.

FEATURES & BENEFITS:

- Ensures the proper operation of vehicle's braking as well as all other vacuum dependent systems
- Engineered and manufactured by an OE manufacturer
- Plug and play replacement for original vacuum pump
- Gasket and/or seal included (when applicable)—not always provided by the dealer but always included with Rein
- 2 year / 24,000 mile warranty
