REIN AUTOMATIC TRANSMISSION SERVICE KITS

Data available through *Activant/Epicor, WHI, or ShowMeTheParts.com*

Rein Automotive now offers a line of OE-quality Automatic Transmission Service Kits for popular BMW models with ZF 6HP series transmissions. These kits address the short-lived valve body sealing sleeves and adapter in ZF 6HP series transmissions. The kits include the necessary direct-fitting sealing hardware to conveniently service the shrunken valve body sealing sleeves during the recommended fluid and filter change interval of 62,000 miles / 8 years, at the latest.

BMW ZF 6HP series transmissions are very durable and powerful units which can last for many miles if serviced in time to allow the valve body to maintain proper fluid pressure. The slightest drop in valve body fluid pressure in these units leads to premature transmission bushing and/or clutch wear along with contamination and overheating of the fluid.

FEATURES & BENEFITS:

- Kits include pan; filter and gasket; pan bolts; valve body sealing adapter and sleeves; harness plug sleeve; and fill plug seal
- Developed in collaboration with industry professionals that regularly service BMW ZF 6HP transmissions
- Helps to restore proper fluid pressure in the ZF 6HP 19 / 26 series transmissions
- A convenient addition to the standard 6HP preventative maintenance service
- OE or Pentosin ATF-1 synthetic automatic transmission fluid is recommended
