REIN COOLANT FLANGE REPLACEMENT KITS

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

The new OE-quality Rein Automotive Coolant Flange Replacement Kits focus on all of the parts surrounding the replacement of a damaged or leaking cylinder head coolant junction flange on popular Audi and Volkswagen models. All kits include the flange, thermostat, temperature sensor, heater and or radiator hose(s), and associated gasket(s) and/or seal(s). Repeated thermal cycling of the plastic coolant flange leads to its deterioration and coolant leaking. The included Rein Automotive replacement coolant flange is made out of OE virgin resin for added durability, and the included replacement hoses are made out of OE EPDM compound material with quick-connect hose end fittings. When replacing leaking and failing cooling system components, it is important to perform a proper coolant flush (using OE or Pentosin Pentofrost series coolant) at the same time to ensure a long life of the vehicle's cooling system. Rein Automotive Coolant Flange Replacement Kits offer a convenient Fix-It-Once solution for this common but time-consuming repair!

FEATURES & BENEFITS:

- Focuses on all parts surrounding the replacement of the cracking or leaking cylinder head coolant junction flange
- Kits include flange, thermostat, temperature sensor, heater hoses, radiator hose, and associated seals
- Rein replacement coolant flange is manufactured with OE virgin resin for added durability
- Included replacement hoses are manufactured with OE compound EPDM material with OE-type quick-connect hose end fittings on the heater hoses
