AAE REMANUFACTURED FORD EPS RACKS

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

Electric power steering (EPS) systems are becoming widely popular among auto manufacturers and most vehicles made after 2014 are equipped with some type of EPS system. Signs of a failing electric power steering include an illuminated EPS warning light, reduced or uneven assist to left and right, and also mechanical noise. Proper diagnostics and visual inspection may prove that a new unit is needed. EPS units are not difficult to replace with proper equipment and following OEM service procedures. CRP Automotive includes guidelines on what hardware and software is needed to finish the installation on AAE-branded racks.

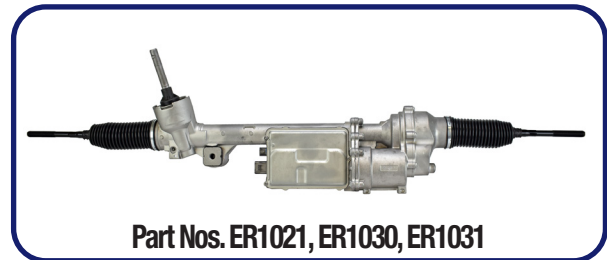

CRP Automotive now offers four AAE-branded remanufactured EPS racks for some highly popular Ford applications. An important thing to note is that there are three different part numbers for 2015-2016 Ford F-150, depending on wheelbase, as these parts are not interchangeable.

FEATURES & BENEFITS:

- 100% vehicle simulation tested
- New drive belt installed and harmonically balanced
- Each unit electronically tested to ensure hassle-free installation and programming
- 2 year / 24,000 mile warranty

Part No. ER1203

Part Nos. ER1021, ER1030, ER1031
