REIN HALDEX SYSTEM CLUTCH FEEDER PUMP SERVICE KITS

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

The Haldex clutch feeder pump is one of the most vital components of the Haldex system, making it possible to provide power to the secondary drive axle when the vehicles ECU receives reports of the primary axle losing traction. Haldex systems are designed to engage the pumps for 2 seconds in 30 second intervals, keeping the system constantly primed. This, as well as extending the fluid service intervals, may cause wear to the pump's electric motor brushes and other internal parts of the pump. Haldex clutch feeder pumps may fail due to:

- Contaminated Haldex fluid (contamination is a result of neglecting the factory recommended fluid changes)
- Clogged filter systems (may lead to additional stress to the pump motor)

Replacing the fluid and filter when replacing the clutch feeder pump will ensure reliable operation until the next Haldex System fluid service.

CRP is proud to offer three new Rein Haldex System Clutch Feeder Pump Service Kits. These kits contain all the necessary components for a successful installation of the pump, including Rein Haldex clutch fluid. Rein Haldex System Clutch Feeder Pump Service Kits incorporate OE pumps and oil filter, seals, and hardware, as well as the Haldex system fluid needed to install this new pump and service the Haldex system.

FEATURES & BENEFITS:

- Kits include all necessary components for a complete and efficient installation
 - CFP0003 & CFP0004: OE pump and oil filter, seals, hardware, and fluid
 - CFP0005: OE pump, seals, hardware, and fluid
- Ensures reliable operation pressure
- Enables professional repair techs to change fluid and filter when replacing old Haldex pumps in one job to keep vehicle's system constantly primed
- Assures proper engagement of four wheel drive
