REIN ELECTRIC WATER PUMP REPLACEMENT KITS

Data available through *Activant/Epicor, WHI, or ShowMeTheParts.com*

Rein Automotive now offers electric water pump replacement kits for popular BMW applications. These kits provide a valuable solution for failure prone cooling related components. At the heart of these kits are OE electric water pumps and OE-quality thermostat assemblies which are complemented by Rein's unique hoses and necessary mounting hardware. Including all of the necessary components for this service ensures that the time-consuming water pump repair is performed in a single effort. Replacing all related cooling system components at a suggested interval of 80,000 miles on these complicated engine platforms and performing a proper coolant flush at the same time will ensure longevity of the system. The OE or Pentosin NF-G11 coolant is recommended for this service.

FEATURES & BENEFITS:

- Kits include OE water pump and bolts; thermostat assembly; head to thermostat hose w/ aluminum flange; WP to head pipe elbow; WP to thermostat hose; and additional required components depending on the application
- Helps to eliminate a repeat repair
- Addresses common coolant hose plastic flange failure
- Ensures proper operation of the cooling system
- Use of OE or Pentosin NF-G11 coolant is recommended
