REMANUFACTURED SUBARU EPS RACKS

Data available through *Activant/Epicor, WHI, or ShowMeTheParts.com*

AAE, brought to you by CRP Automotive, now offers first-to-market remanufactured electric power steering racks for the popular 2015-2016 Subaru Legacy and Outback models. There are several components inside the steering gear which may malfunction – the torque sensor, the electric motor, or the actual steering control module which is integrated into the steering gear. At AAE we completely disassemble each rack, replace all internal wear components, and assemble back to OE specifications. Through diagnostic software, we monitor the live data values of the rack and clear any DTCs to ensure proper operation.

FEATURES & BENEFITS:

- First-to-market direct replacement part
- Completely remanufactured with all new seals, gaskets, internal bar bushings, motor coupler, bellows and clamps
- Each unit is tested electronically with vehicle simulation software
- Programming of the rack itself is not required
- When wheel alignment is adjusted, the steering angle sensor must be calibrated (not part of the rack)
- Each unit is already serviced to address a Serviced Bulletin issued by Subaru (04-17-17R) regarding concerns of a rattling sound identified as coming from the EPS rack assembly

CRP Part No.	Applications	VIO US	VIO Canada
ER7040	SUBARU LEGACY 2.5L 2015; LEGACY 3.6L 2015	66,384	3,411
