HIGH-QUALITY RE-ENGINEERED POWER STEERING PUMPS FOR IMPORT VEHICLES **DESIGNED TO BE BETTER THAN OE.**

5760N Honda/Acura

RE-ENGINEERED NEW POWER STEERING PUMP

- For Honda Accord 2008-2012, Honda Pilot 2005-2011, Honda Odyssey 2005-2010, Honda Ridgeline 2006-2011, and Acura MDX 2003-2006
- **Your solution to an OE valve design flaw**
 - Special valve design ensures proper pressure and eliminates excessive wear
 - Pre-installed return pipe makes installation a snap and eliminates leaks and excess noise
 - 2 Year / 24,000 mile warranty
 - All parts are quality tested in the USA
- **This product is sold new, saving you the hassle of returning the old part**

This pump is re-engineered to overcome a serious OE valve design flaw. The OE valve exposes the valve guide walls to excessive wear leading to low pressure and poor performance. Our solution is a special valve design which features a larger surface area allowing better contact between the valve and valve guide wall eliminating wear. In addition, this re-engineered power steering pump also provides a professionally pre-installed return pipe virtually eliminating the noise the OE pump is notorious for.

IMPROVING AN OE DESIGN FLAW

OLD **NEW**

NEW VALVE DESIGN

The OE valve has a design flaw causing the valve guide walls to wear excessively which leads to low pressures and poor performance. AAE has improved the valve design by creating a larger surface area where the valve comes in contact with the valve guide walls virtually eliminating wear.

O-RING

PRE-INSTALLED RETURN PIPE

This pump has a notorious noise issue caused by air entering the system. This problem leads to customer complaints and high shop returns. With reman pumps, the return pipe is not typically supplied, and the shop must reuse the existing return pipe and install the new o-rings. Correctly installing the return pipe can be very difficult and lead to pinched and/or cut o-rings which can cause severe air leaks. This AAE New Pump eliminates this issue by shipping with the return pipe already professionally installed.
