HIGH-QUALITY NEW STEERING PRODUCTS FOR DOMESTIC VEHICLES DESIGNED TO BE BETTER THAN OE.

NEW GEARBOXES

The quality and reliability of the steering gear box you install is essential for the performance of your vehicle. The OE design features sector shafts that are too hard and undersized, leading to premature failure under normal loads. The AAE design fixes this issue with larger, case-hardened shafts and oversized bearings for superior performance.

- For various Ford F100-F350 Truck models
- Meets or exceeds OEM performance
- 2 Year / 24,000 mile warranty
