

ANTIFREEZE

# PENTOFROST A2

Antifreeze Specially Formulated For Asian Vehicles  
– 50/50 Prediluted

## DESCRIPTION

**Pentofrost A2** is a phosphated organic acid technology (phosphated OAT); which is categorized as HOAT (hybrid organic acid technology) in the US market. Pentofrost A2 is suitable for all Asian vehicles using “green” Antifreeze/Coolant. Pentofrost A2 does not contain any silicate, borate, nitrite, or amine additives since these may harm your Asian vehicle. Do not mix with other coolants (especially silicated coolants), as this may cause gel formation and clog your radiator. Pentofrost A2 is a **PREDILUTED** antifreeze for Asian vehicle applications in water-cooled engines. It contains phosphates and organic salts to protect all materials used in cooling systems for Asian vehicles. Pentofrost A2 is mixable with all phosphate OATs. Meets ASTM D-3306.
