

OE-QUALITY PARTS FOR EUROPEAN AND ASIAN VEHICLES

Manufactured in Spain. Designed for top European and Asian vehicles. And brought to you by CRP Automotive. AJUSA is a leading brand of OE-quality automotive gaskets, gasket sets, head bolts, head bolt sets, and hydraulic lifters. So the next time you're looking for a way to quickly and easily fill gaps in your coverage, remember to choose AJUSA.

HEAD GASKETS & GASKET SETS

In addition to their already wide range of head gaskets for European and Asian vehicles, AJUSA also offers head gasket sets that include all the required gaskets and seals.

HEAD BOLTS & HEAD BOLT SETS

Cylinder head bolts are responsible for holding the cylinder head to the engine block. On most modern engines, stretch bolts are typically used and must be replaced when the head gasket is changed. AJUSA offers one of the widest and deepest cylinder head bolt programs on the market.

VC GASKETS/VC GASKET SETS

Valve cover gaskets are used to seal the valve cover to the cylinder head. AJUSA makes OE-quality gaskets for a growing number of European and Asian applications, plus sets that include all the needed ancillary parts.

HYDRAULIC LIFTERS

Hydraulic lifters ensure the correct amount of clearance in the valve train of an engine so that it remains quiet and operates correctly. AJUSA hydraulic lifters are all designed to OE specifications and shipped in plastic trays that keep each lifter isolated, oiled, and protected until they are ready to be installed.

INTAKE/EXHAUST GASKETS

These gaskets seal components in the intake and exhaust systems of the vehicle such as the intake manifold, intake plenum, and exhaust manifold to the engine or other components. Like all AJUSA products, these gaskets are OE-quality in fit, form, and even material type.

AJUSIL SILICONE SEALANT

Quick-curing Ajusil is used to seal water pumps, oil pumps, oil pans, and valve covers to the engine — and in some cases, transmission pans to the transmission. It's specially designed to work in a wide range of automotive environments.
