

# WHAT'S HOT AT CRP AUTOMOTIVE

## New Power Steering Pump Kit CRP Part No. 5655NKTA

Multiple applications for Land Rover and Volvo 2007-10 (100K+ VIO)

First-to-market new hydraulic power steering pump kit includes new AAE HPS pump, pulley, return pipe, remote reservoir, and bracket. It is recommended to replace reservoir along with pump to prevent issues due to clogged reservoir screens. All AAE new pumps are sold without core charge. Each unit is 100% hydraulically tested under load in the USA.

## Transfer Case Overhaul Kit CRP Part No. RVK0004

BMW X3 2011-17; X4 2015-18; X5 2011-18; X6 2008-19 (655K VIO)

First-to-market solution kits designed in partnership with LMV Bavarian to perform a complete overhaul service of X-Drive transfer cases. Kit includes bearings, clutch packs, shims, magnets, retainers, hardware, seals, PPS parts, and other necessary internal components. Offers a new solution to repair these failure prone transfer cases versus the previous options of replacing with a complete assembly at the dealer or installing a used assembly.

## TechSelect Turbo Kit CRP Part No. TRK0007

BMW 335i 3.0L 2007-10; 335i xDrive 3.0L 2009-10; 335i 3.0L 2011-13; 335xi 3.0L 2007-08 (96K VIO)

First-to-market solution kit for turbocharger replacement service, featuring direct replacement components for the OE parts. Kit includes the hoses, gaskets, and hardware needed to successfully perform the job effectively in both time and cost. Hoses included are the most recent versions, ensuring that all turbo fluid hoses are up to date.

## SELECT PLUS Timing Chain Solution CRP Part No. CKP0230

Multiple applications for late Audi/VW EA888 2.0L models (175K+ VIO)

First-to-market, innovative solution for timing chain replacement in the EA888 2.0L, found in many popular late model Audi/VW. This line offers a comprehensive solution versus other timing kits on the market, with up to 23 components offering a true job in a box. All solutions are road tested and feature OE timing components.

## Water Pump Assembly Kit CRP Part No. WPU0505

BMW 135i 3.0L 2008-10; 335i 3.0L 2007-10; 335i xDrive 3.0L 2009-10; 335xi 3.0L 2007-08 (100K VIO)

First-to-market, better-than-OE water pump kit featuring upgraded water pump with all aluminum housing, versus the OE's plastic version. Kits also include bolts; thermostat assembly; head to thermostat hose w/ aluminum flange; WP to head pipe elbow; WP to thermostat hose; and additional required components based on the application.

## Turbocharger Coolant Line CRP Part No. CHU0746

Multiple applications for MINI turbocharged 4 Cyl. 1.6L models 2011-2014 (250K+ VIO)

Upgraded turbocharger coolant line featuring a metal fitting as well as metal hose clamps, versus the failure prone OE plastic fitting and plastic hose crimps. Direct replacement for OE hose – includes all components and branches. Eliminates the common failure points of the OE to ensure a longer, problem-free service life for the part.

## Turbo Coolant Hose Assembly CRP Part No. CHU0719

Multiple applications for Mercedes-Benz 2012-2019 w/ Turbocharged 8 Cyl. 4.7L Engines (56K+ VIO)

First-to-market, upgraded hose assembly featuring full aluminum construction, an upgrade from the OE's use of plastic fittings with history of becoming brittle or cracking. Eliminates the common failure points of the OE version to ensure a longer, problem-free service life for the part and reduce the number of times this hose assembly will need to be replaced on a vehicle

## ATF 64 Transmission Fluid CRP Part Nos. 1058113/1058215

Multiple applications for Aisin AW automatic transmissions (175M+ VIO)

Approved by General Motors (DEXRON-VI) and Ford (MERCON LV) in specified automatic transmissions, and JASO 1-A-LV coverage in Japanese automatic transmissions. Specially formulated additive technology provides exceptional anti-shudder performance to improve driving experience. Supported by real-world testing in a range of passenger vehicles with nearly 1,000,000 kilometers of driving.

## ATF 134 FE PLUS Transmission Fluid CRP Part Nos. 1090117/1090216

Multiple applications for Mercedes 9-speed transmissions Type 9-G Tronic 2017-on (1.4M+ VIO)

First-to-market premium performance fluid with reduced viscosity formula specially developed to further optimize fuel-economy and gearbox efficiency. Extremely low viscosity offers enormous potential for fuel savings and very good low-temperature properties. Optimized friction stability over life for extended oil change intervals.
