PENTOSIN TESLA EV FLUID PROGRAM

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

CRP Automotive now offers two **new** Pentosin automotive fluids for use on some of the most popular Tesla models on the road today. The **Pentosin Tesla EV Fluid Program** includes Pento EDF-2 (CRP Part Nos. 1100117 1L / 1100216 5L) and ATF 64 (CRP Part Nos. 1058113 1L / 1058215 5L), two Electrical Drive Fluids (EDF) designed for Tesla models ranging from model years 2009 to 2021.

Pentosin Pento EDF-2 is designed for direct cooled E-motors found on Tesla Model 3 (2018+) and Model Y (2020+) vehicles. The fluid serves as a lubricant for the gearbox and as a coolant for the transmission, providing increased efficiency compared to standard fluids.

Pentosin ATF 64 is designed for E-axles with dry E-motors found on Tesla Model S (2012-21), Model X (2016-21), and Roadster (2009-12) vehicles. The fluid provides a high efficiency potential that helps increase driving range while lowering CO2 footprint.

The Pentosin Tesla EV Fluid Program was recognized with the “Best Functional Fluid” award during the Import Vehicle Community’s annual Import Products and Marketing Awards ceremony at the 2023 AAPEX Show in Las Vegas, NV.

CRP Part No. 1100117 (1L)
CRP Part No. 1100216 (5L)

CRP Part No. 1058113 (1L)
CRP Part No. 1058215 (5L)
