REIN MAGNETIC ENGINE OIL DRAIN PLUG

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

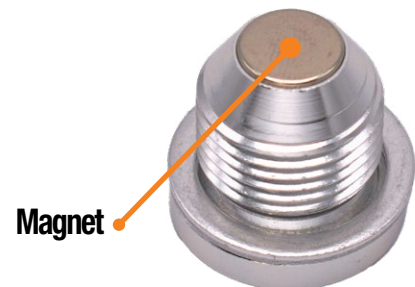

CRP Automotive now offers a new Rein Magnetic Engine Oil Drain Plug (CRP Part No. HWU0098) for popular Porsche applications. This pencil-style drain plug features an upgraded design from the OE part and includes a captive magnet. To protect the vehicle owner's investment, Rein Magnetic Engine Oil Drain Plugs act as a quick additional point of inspection for engine wear during an oil change. The captive magnet is made of rare earth metals and is used to attract engine wear particles that may have been missed by the oil filter. By holding onto these metal particles, it gives an insight into the health of the vehicle's engine while preventing the particles from being recirculated and causing more damage.

FEATURES & BENEFITS:

- Designed and constructed to strict engineering quality standards to ensure proper sealing
- Pencil-style plug with captive magnet designed as an upgrade to the OE
- Made using high-quality materials and rolled threads
- Includes one-time use crush washer
