## PENTOSIN PENTOFROST 50/50 EUROPEAN ANTIFREEZE

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

CRP Automotive has expanded our trusted Pentosin PENTOFROST line with the addition of convenient, ready-to-use 50/50 prediluted antifreeze, specifically designed for European vehicles. The new PENTOFROST E, SF, and NF 50/50 prediluted formulas utilize deionized water, removing harmful ions that can contribute to corrosion and scale buildup. Prediluted formulas ensure a 50/50 mix every time, preventing engine damage caused by incorrect dilution.

**PENTOFROST E 50/50** is designed for multipurpose applications in water-cooled engines, offering exceptional performance through an eco-friendly manufacturing process.

It contains no nitrites, amines, or phosphorous additives. This coolant protects all materials used in cooling systems and is recommended for non-ferrous metals and year-round use. PENTOFROST E 50/50 meets ASTM-D-3306 and can be used where G12++, G13, G40 are required.

**PENTOFROST SF 50/50** is designed for multipurpose applications in water-cooled engines and contains no nitrites, amines, phosphorous additives, or silicates. It protects all materials used in cooling systems and is recommended for non-ferrous metals and year-round use. PENTOFROST SF 50/50 meets ASTM D-3306 and can be used where G12, G12+, G40 are required.

**PENTOFROST NF 50/50** is designed for multipurpose applications in water-cooled engines and does not contain nitrites, amines, or phosphorous additives. It protects all materials used in cooling systems and is recommended for non-ferrous metals and year-round use. PENTOFROST NF 50/50 meets ASTM D-3306 and can be used where G11, G48 are required.

See reverse side for detailed applications.
