REIN MAGNETIC DRAIN PLUG PROGRAM

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

CRP Automotive has expanded its **Rein Magnetic Drain Plug program** to cover a wider range of makes and models, following the successful February 2024 launch of the HWU0098 magnetic engine oil drain plug for popular Porsche applications. This extensive program now includes 14 SKUs that fit over 160 million vehicles currently on the road across the USA and Canada. These Rein drain plugs feature a flush tip-style design with upgraded aluminum construction, offering a superior alternative to the OE parts.

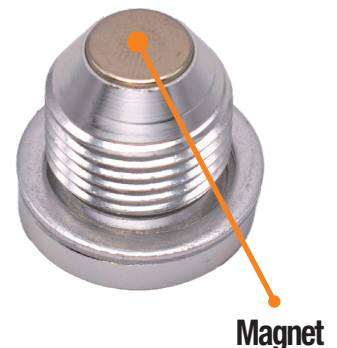

To protect the vehicle owner's investment, Rein Magnetic Drain Plugs act as a quick additional point of inspection for engine, transmission, or differential wear during fluid service with the inclusion of a captive magnet. The magnet is made of rare earth metals used to attract wear particles that may bypass the oil filter. By preventing metal particles from being recirculated, Rein Magnetic Drain Plugs help reduce the risk of further damage and provide valuable insight into the health of the vehicle's applicable system.

FEATURES & BENEFITS:

- **Designed and constructed to strict engineering quality standards** for proper sealing and fit.
- **Aluminum construction** with a flush tip magnet for an upgraded alternative to the OE part.
- **Manufactured with high-quality materials** and precision rolled threads.
- **Includes a single-use crush washer** (HWU0065 features an embedded O-ring).

CRP Part No. HWU0098
