REIN WATER PUMP SERVICE KITS FOR MINI

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

CRP Automotive now offers two new **Rein Water Pump Service Kits** for N12/4/6/8 MINI engine platforms, providing a valuable solution to address failure-prone cooling-related components.

Each Rein Water Pump Service Kit features an **upgraded** water pump with a metal impeller, as well as a water pump gasket, mounting hardware, and the latest thermostat. Additionally, these kits include the plastic thermostat to water pump coolant pipe, which is known to prematurely fail and leak. Replacing these critical components together ensures a complete and reliable repair when servicing a defective water pump on these applications.

FEATURES & BENEFITS:

- Ensures the water pump replacement is done right the first time by including all critical components.
- Helps to eliminate the need for future repairs of related parts by covering these components in the current service.
- Upgraded water pump featuring a metal impeller that resists degradation compared to plastic alternatives.
- Includes water pump gasket, failure-prone coolant pipe, latest thermostat by application, and necessary hardware for a complete installation.
