## REIN COOLANT HOSE METAL CONNECTORS FOR BMW & AUDI

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

CRP Automotive now offers two new upgraded Rein Coolant Hose Metal Connectors (CRP Part Nos. CHU0939 & CHU0648) for select BMW and Audi applications. CHU0939 is designed for 2009-2013 BMW 6-Cyl. 3.0L Diesel engines, and CHU0648 fits 2005-2009 Audi 4-Cyl. 2.0L engines.

Feedback from the CRP Automotive Innovation Council identified the OE plastic connector as a common failure point on these engines due to brittleness and cracking caused by repeated thermal cycling and hydrolysis. Hydrolysis occurs when water breaks down plastic or rubber, leading to structural degradation and eventual failure. The upgraded Rein connectors are constructed with aluminum to offer a more durable alternative to the OE parts and eliminate common failure points.

### FEATURES & BENEFITS:

- **Direct OE Replacement:** Ensures hassle-free installation.
- **Upgraded for Durability:** Aluminum construction provides superior resistance to cracking, brittleness, and damage caused by thermal cycling and hydrolysis.
- **Longer Service Life:** Upgraded materials and construction reduces the frequency of replacements and overall maintenance costs.
- **Additional Inclusions for Easy Installation:**
  - CHU0939: Includes the necessary gasket
  - CHU0648: Includes temperature sensor and o-ring

Part No. CHU0939  
(connector & gasket)

Part No. CHU0648  
(connector plus temperature sensor & o-ring)
