REIN MAGNETIC DRAIN PLUGS

Data available through [Activant/Epicor](#), [WHI](#), or [ShowMeTheParts.com](#)

CRP Automotive has expanded its **Rein Magnetic Drain Plug** program with the addition of **three new magnetic drain plugs**, extending program coverage across a wider range of makes and models. The program now includes 17 SKUs, covering over 164 million vehicles currently on the road in the USA and Canada. This expansion adds an additional 4 million vehicles through new BMW and Rolls-Royce applications as well as domestic vehicles from Chrysler, Dodge, Jeep, and Plymouth.

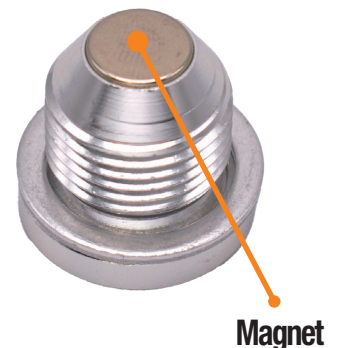

Rein Magnetic Drain Plugs feature a flush tip-style design with a captive magnet that adds a valuable inspection point during routine fluid service. The magnet is made of rare earth metals used to attract wear particles that may bypass the oil filter. By preventing metal particles from being recirculated, Rein Magnetic Drain Plugs help reduce the risk of further damage and provide valuable insight into the health of the vehicle's applicable system.

FEATURES & BENEFITS:

- **Designed and constructed to strict engineering quality standards** for proper sealing and fit.
- Aluminum construction with a **flush tip magnet** for an upgraded alternative to the OE part.
- **Manufactured with high-quality materials** and precision rolled threads.
- **Includes a single-use crush washer** (HWU0117 features an embedded O-ring).
