REIN THERMOSTAT HOSES WITH METAL CONNECTOR FOR BMW

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

CRP Automotive has expanded its Rein Upgraded Thermostat Hose program with **eight new part numbers** featuring pre-mounted metal connectors. The added coverage supports more popular BMW applications and gives technicians an upgraded option for replacing thermostat hoses originally equipped with plastic connectors.

Plastic connectors in the cooling system are exposed to constant heat, pressure, coolant, and thermal cycling. Over time, the material can become brittle and may crack or leak, often requiring hose replacement. Rein Upgraded Thermostat Hoses replace the OE-style plastic connector with a metal connector that comes pre-mounted to the hose, helping reduce installation time and providing a more durable repair solution.

Rein Automotive also offers the individual metal connector for these applications (CRP Part No. CHC0609) when only the fitting needs to be replaced.

FEATURES & BENEFITS:

- Pre-mounted metal connector replaces the OE plastic connector for a more durable alternative.
- Helps address a known cooling system failure point caused by heat, pressure, coolant exposure, and thermal cycling.
- Pre-mounted design helps save installation time by eliminating the need to transfer or separately install the fitting.
- Direct-fit replacement designed for proper fit and function.
