REIN AUXILIARY WATER PUMPS FOR TESLA

Data available through Activant/Epicor, WHI, or ShowMeTheParts.com

CRP Automotive has expanded Rein's electric vehicle product portfolio with five new Auxiliary Water Pumps for Tesla applications. This expansion gives distributors and repair facilities aftermarket replacement options to support growing Tesla service needs.

Developed with the professional technician in mind, Rein includes new replacement mounting bushings with each auxiliary water pump where applicable. Packaging the pump and corresponding bushing together allows both components to be replaced during the repair, supporting proper mounting and a more complete, straightforward installation.

**Part Nos. WPA0547, WPA0548, WPA0549,
WPA0550, WPA0551**

The program also features an aftermarket replacement for the Tesla Super Manifold auxiliary water pump (CRP Part No. WPA0550). This pump helps maintain coolant circulation through the Super Manifold, supporting thermal management system performance. Rein's replacement provides repair facilities with a dedicated replacement designed to restore proper coolant flow.

Rein Auxiliary Water Pumps feature high-quality plastic or metal construction, depending on the application, with flow rates matched to OE specifications. Each pump is designed to match OE fit, form, and function, providing technicians with an application-specific replacement for Tesla cooling system repairs.

FEATURES & BENEFITS:

- Expands Rein's EV aftermarket coverage for Tesla applications
- High-quality plastic or metal construction
- Flow rates matched to OE specifications
- Includes vibration isolators, mounting brackets, and hardware where applicable for straightforward installation
